Summer Event Again Main Chamber Topic

Klondike Kampers Karnival was again the major topic at last Thursday's meeting of the Drayton Valley and District Chamber of Commerce.

A report and recommendations of the KKK committee were read and discussed at length. Recommendations by the committee call for many changes in the event in the future.

The summer event has failed financially on two occasions and general membership of the Chamber appeared in agreement to suggestions that a number of changes are required.

Recommendations, with additional Chamber suggestions, will be handed over to the new KKK committee. An attempt will be made very soon to obtain a chairman for the new

committee.

Other business of the meeting included the appointment of a nominating committee to bring in a slate of officers for the December election. Members of the nominating committee are Ron Smith, Fred Raven and Roy Burrows.

It was reported at the meeting that Barney McGlone would attend the Canadian Tourist Association meeting at the coast this month.

Also discussed at some length was the problem of increasing Chamber membership. A number of suggestions were discussed but the meeting adjourned without any action being taken.

D. V. Highlights

BY MRS. EDITH DEBY

Believe it or not: Otto Guze dug a hill of potatoes containing 70 good sized potatoes and some small ones. Mrs. Nels Erickson produced a carrot measuring fourteen and a half inches long. Now if the grain will just yield as well we'll all be on Easy Street.

Mrs. Jenkins of Parksville, B.C. is visiting her son-in-law and daughter, Mr. and Mrs. Dan Bills. Mrs. Jenkins has just returned from Montreal where she has visited other members of her family.

Mr. and Mrs. Helmut Weichert, Terry and Bruce, spent part of the long weekend with Mr. Wiechert's mother.

On October 1st, Rusty Jorgeson took over the F.U.A. Co-op Bulk Sales in Drayton Valley. We wish Mr. Jorgeson every success in his new business venture. Mrs. Jorgeson is the former Noreen Landsiedal.

Wedding bells will ring next Saturday for Kenneth Landsiedal and Miss Janet Ruth Holsted of Barrhead. Kenneth is the son of Mr. and Mrs. Adolph Landsiedal of Violet Grove.

Mrs. Henry Dunnington spent the weekend with her son-in-law and daughter, Mr. and

Mrs. William Chisholm in Calgary.

Mr. Wollschlager had visitors from Oregon recently. His niece, her husband and friends were here for a brief stay.

Mr. and Mrs. Charles Davies are holidaying in California.

Royal Purple Lodges To Meet Here

Drayton Valley Lodge #196 of the Order of the Royal Purple will host a meeting for the lodges in District #12 on October 21st when they will be honoured with a visit from the Supreme Honoured Royal Lady, Lady Johnson from Powel River, Manitoba.

Members of Drayton Valley Lodge will be finalizing plans for this visit at their next regular meeting on October 18th.

Grandma: Give me a mousetrap quickly. I have to catch a bus.

Clerk: Sorry, ma'am, we don't have any that big.

Representatives of almost 100 communities from all parts of the province, met with provincial and federal Centennial officials in Edmonton recently, for the purpose of finalizing arrangements for the visits of the Centennial Train and Centennial Caravans during 1967, and to hear of advertising and promotion plans which will sup-

port these two major projects of the Centennial Commission.

The group pictured above includes, left to right: Ray Wickens of Drayton Valley, Keith Sterling of Wetaskiwin, D. Krichke of Leduc, Charles Wells of Raymond, Garry Duke of Toronto, and John Coupland of the Centennial Commission, Ottawa.

--Alberta Government Photo

Chamber Hears Centennial Plans

Ray Wickens, chairman of the Drayton Valley Centennial Committee, attended last Thursday's meeting of the local Chamber of Commerce and reviewed Centennial activities to date and revealed some of the plans for Canada's 100th birthday next year.

Mr. Wickens stated that the major project, the Centennial Civic Centre, is hoped to be completed by the end of October. The project he said, has drawn heavily on the committee's time for many months, but upon its completion more emphasis will be laid on other aspects of the Centennial.

More time will be devoted in the near future to helping groups and individuals formulate and put across Centennial plans.

An opportunity already exists he said, for groups who would like to tackle projects leading to the completion of the Civic Centre. Landscaping will soon have to be done and furnishings will be required for skill, craft and reading rooms in the new building. Any one of these could be undertaken by groups or individuals as a Centennial project.

Another feature of the Civic Centre is the possibility of a museum. Mr. Wickens stated that a small room could be made available to begin a local museum. This again would require the active interest of some community organization.

The busy days ahead, starting with the Voyageur Canoe Pageant in May up to the July visit of the Centennial Caravan, were discussed and the need for a great deal of work on the local level pointed out.

The caravan will include a stage on which it is intended to present entertainment featuring local and district performers. The caravan appearance will be serving a large surrounding area, Mr. Wickens stated, and it is hoped

that residents of district communities will take an active part in festivities during its stay here. It is also hoped to place emphasis on children's activities throughout the Centennial celebrations.

The Voyageur Canoe Pageant, the first big Centennial attraction, is naturally receiving a good deal of attention. Test runs by the canoes during the summer established many of the requirements to make for a spectacular show.

Details of the visit here by the canoes are still being worked out but Mr. Wickens reported that the canoe teams will camp overnight in the downtown area and take an active part in whatever festivities the community may plan. Some sort of large scale party will be undertaken with more definite details emerging as committees go about preparations for the events.

Ratepayers To Vote On Plebiscite

Drayton Valley residents will go to the polls on Wednesday, October 19th to decide the issues of Sunday sports and fluoridation of the town water supply. There is no election this year for various council and board positions as all were filled by acclamation on nomination day, September 28th.

Polling will take place at the Town Hall between 10:00 a.m. and 7:00 p.m. on Wednesday, October 19th.

Curling Meeting

The Ladies Curling Club are having a re-organizational meeting on October 20th at 8:00 p.m. in the curling rink.

The club is asking that all those interested in curling attend this meeting. If you have been considering this popular sport and have never thrown a rock this is your invitation to come and join in. A cordial invitation to attend is also extended to any "old hands" who have recently moved into the district and to all the old members of the club.

There will be an election of officers and plans will be laid for the coming season.

Junior High School Awards Night

Drayton Valley Junior High School will hold an Awards Night on Friday, October 14th at 8:00 p.m. in the auditorium of Frank Maddock High School.

Parents of the community are extended an invitation to attend the event during which awards will be made for honors merit and attendance.

Guest speaker for the evening will be Mr. R. Woods, Principal of Frank Maddock High School and a program will be presented by Junior High students to round out the

evening.

Coffee will be served and all are welcome to attend.

JACKPOT WINNER

At the regular weekly Elk's Bingo on Wednesday, October 5th, Mrs. F. Wood was the lucky jackpot winner of \$234.90. Congratulations.

TOWN VISITOR

Mr. and Mrs. L. Johnston, had as their guest this weekend, Miss Ellen Johnston of Birch Hills, Saskatchewan.

EVANSBURG NEWS

Mrs. M. Bruner, Correspondent

The sight of falling snowflakes today, (the 11th) made the children think Christmas was approaching fast even if Thanksgiving is just gone. Fortunately, the flakes melted away as soon as they fell so we may have a nice fall yet. Many farmers are still working every day the weather allows to get their crops in.

The volunteer firemen all pitched in and helped to gather donated household goods to help the Stan Greenwood family set up their home again when the whole house and contents were lost in a recent fire. Fortunately no one was hurt.

People move in, people move out and people just move from house to house in the village. The Lauer family now occupy the house formerly occupied by the Bailey family while the Bailey family live in the home vacated by the Dodd family when Constable Dodd was transferred. The home formerly occupied by the Lauer family is now the home of newly weds, Mr. and Mrs. Jim Hunter.

A centennial meeting open to the residents of the village and surrounding area was held last week in the Legion Hall. Some changes have had to be made in the original plans made by the Centennial Committee.

No more rickety wooden steps to go into the Legion Hall; a smart new set of concrete steps have been installed and new handrails will soon adorn the steps.

The FUA local held their fall meeting at the Mazeppa home last week. Main business of the evening were the plans for the district banquet to be held in the Wildwood community hall on the 26th of this month.

Rocky Rapids News

Mrs. Eileen Belva
Correspondent

Get well wishes go out to Eddie Schultz in the Col. Mewburn Hospital.

The proud lady you will see driving the new Vauxhall is Doris Stewart. She spent the weekend in Westlock with her daughter and son-in-law, Mr. and Mrs. C. Herndon and family.

Congratulations are extended to Mr. James Taylor who celebrated his 85th birthday on September 29th.

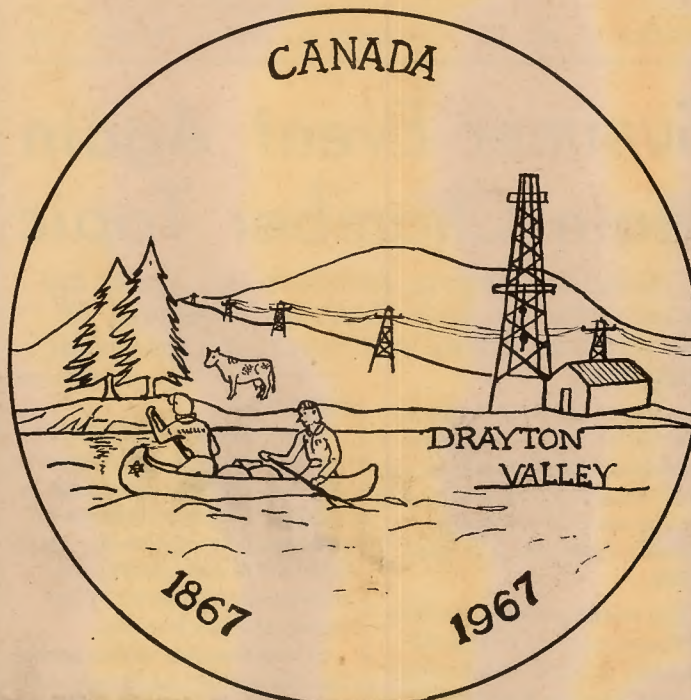

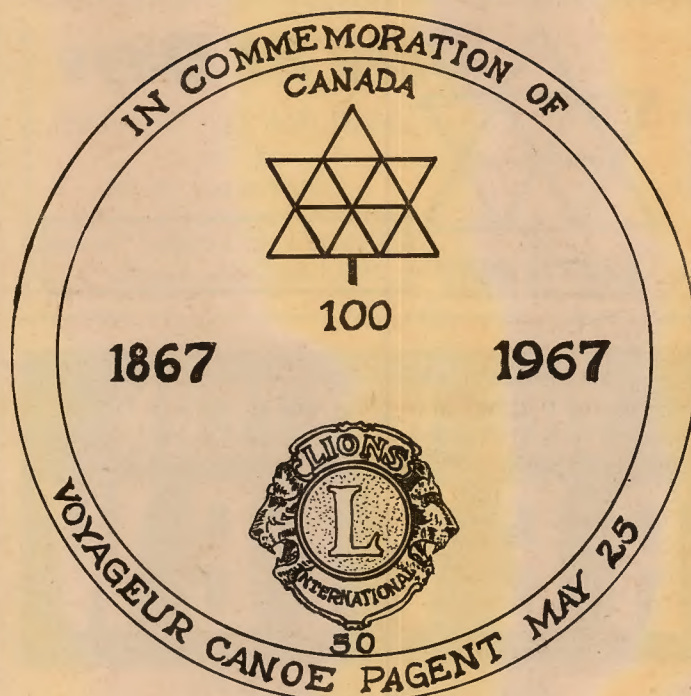

Rene and Eileen Belva motored to Ryley on October 1st to visit Eileen's aunt and uncle, Mr. and Mrs. George Cline.

Visitors over the Thanksgiving weekend were Helge and Jennie Lundell of Wetaskiwin, Helge's sister, Mickey Lundell of Edmonton, all at the home of Jennie's brother, Mr. and Mrs. E. Lindskoog.

Mr. and Mrs. Roy Bentz and Cindy of Calgary visited Darlene's parents, Mr. and Mrs. William Richardson.

Mr. and Mrs. Empringham had a visit from her parents from Saskatchewan.

Vera McCullagh from Vancouver stopped off enroute to Mexico to visit his uncle, Mr. and Mrs. Maurice McCullagh here.

The above illustrations are front and back views of the Centennial Souvenir coin to be circulated by the Drayton Valley Lions Club during 1967. The coins will have no monetary value but will be circulated to Drayton Valley visitors and residents as a Centennial project by the Lions Club.

United Church Women Meet at Pigeon Lake

Seventy members of the United Church Women of the South Edmonton Presbytery District held a most successful rally at Rundle Mission, Pigeon Lake, on September 22. The beautiful autumn colors, warm sun and the lakeside view made a most picturesque setting for the U.C.W. to reflect on the pioneer days of the Rundle Mission.

United Church Women of Devon convened the rally, for which they chose the theme "Effectiveness of the U.C.W. in the Rural Community". Millet, Drayton Valley and

Devon groups each presented a panel discussion on this theme, each taking a particular phase.

Millet U.C.W. evaluated their "Effectiveness within their own U.C.W.". They pointed out that to be most effective we must follow our constitution closely. The U.C.W. representatives from Drayton Valley evaluated their "Effectiveness within their Church". The Devon group evaluated their "Effectiveness within the Community".

In addition to the above

groups, U.C.W. members from Breton, Calmar, Leduc, Telfordville, Thorsby and Warburg all participated in the day's program.

CORRECTION

We regret an error that occurred in the Buck Creek News last week in the account of the passing of Mr. Jules Tucken. The report mentioned Mr. Tucken's enthusiasm for hunting in his earlier years and should have read, "was a very imaginative wood carver in later years."

The Mayans invented their calendar about 300 B.C.

Carnwood News

Mrs. Rose Saunders, Correspondent.

Royal Canadian Legion (Warburg) raffle was not drawn on September 30th as some of the books were not turned in.

Bob Barnett had the misfortune to injure his hand at work on Friday, we understand he'll be off work for a few days.

Mr. and Mrs. Rod Brunken and family of Leduc visited at the home of the latter's father and sister, Mr. Wm. Hankins, Elaine and Kathie.

Miss Patty Wieting of Thorsby was home over the weekend.

A few folks from the district

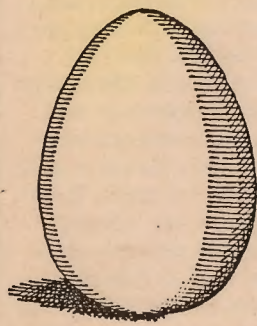

were lucky at the Elk's Bingo at Warburg. They were: Mrs. Betty Wollen, a turkey; Mrs. Florence Armstrong, a ham; and Mrs. Bernice Haffner.

Congratulations go out to Mr. and Mrs. Terry Gavigan on the birth of a baby daughter. The proud grandparents are Mr. and Mrs. Ira Haight and Mr. and Mrs. Pat Gavigan

**THINK

FIRE**

...wherever you are

double your money with Canada Savings Bonds Centennial Series

Centennial Series Canada Savings Bonds offer you their highest interest yield ever—5.48% a year when held to maturity.

The new Bonds pay annual interest at the rate of 5% for each of the first four years; 5½% for each of the next three years; 5¾% for the following year and 6% for each of the last five years—a total of \$72.25 in interest on every \$100 Bond.

And for the first time, there is a special compound interest option. To take full advantage of it, leave all the annual interest

uncollected until Nov. 1, 1979, and you will get interest on your interest, amounting to \$27.75 extra on every \$100 Bond.

It all adds up to total interest of \$100 on every \$100 Bond. It's a safe, sure way to save. **DOUBLE YOUR MONEY** with Canada Savings Bonds Centennial Series.

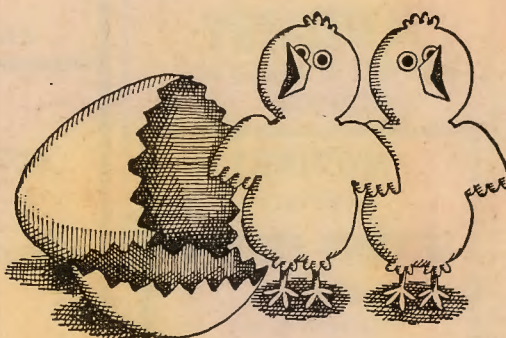

This Series retains all the traditional features which make Canada Savings Bonds Canada's most favoured investment.

They are still easy to buy for cash or on instalments where you work, bank or invest.

You may buy as little as \$50 or as much as \$10,000. Every Canadian resident may buy up to this limit. So can estates.

They are still simple to cash, anytime, at any bank in Canada for their full face value plus earned interest. Just fill out the redemption form on the Bond, present it to your bank and you'll get your money right away.

And now they're better than ever to keep with the highest interest yield ever and interest on interest. **DOUBLE YOUR MONEY** with Canada Savings Bonds Centennial Series.

Editorial Comment

Museum Opportunity

The recent announcement by the Centennial Committee that space could be made available in the new Centennial Civic Center for a small museum will, we hope, attract the interest of some local organization. Failing that, it might inspire the formation of an historical society.

Space available will not be large but should be enough for a compact, specialized type of museum. It could, at the very least, be a start to preserving the history of our area that will be lost forever unless we make a move soon.

Feed Mill Needed Here?

For some time we've heard talk around Drayton Valley about the need for a feed mill to meet the requirements of farmers living in the western area of the province. Such a mill, it is felt, would prove a welcome addition by providing a local market for grain and a nearby feed service for the many stock raisers in this part of the country.

In this regard it is interesting to note that recent news stories indicate a new feed company formed by United Grain Growers will be in operation by January 1st and is expected to have forty feed mills in the Prairie provinces within ten years. An intensive program of feed mill construction will start immediately in Alberta, and in Saskatchewan, Manitoba and the Peace River block in B.C. in the next two years. A company representative is reported to have said that, "United Feeds Limited has been formed to give farmers' organizations a share in the fast-growing feed market in Western Canada."

We have no idea if local capital, or even local interest, is available for such an undertaking but feel that an approach by the Chamber of Commerce to the new company would be well worth the effort. If nothing else, we would at least learn from people who are presumably experts in the field, whether or not a feed mill would be a feasible undertaking in this area.

Busy Summer for 4-H'ers

Last summer was a busy one for Alberta's 4-H'ers. Over 1,800 of these young people took part in provincial camp and club week programs, planned and directed by the 4-H Division of the Department of Youth and key personnel from sponsoring organizations.

Educationally oriented, these programs included three club weeks at the Vermillion and Olds Agricultural and Vocational Colleges and camps at the Edmonton and Calgary Exhibition Grounds, the Fairview Agricultural College, Camrose, Vegreville, Elkwater, and Buffalo Lake.

Seventy senior 4-H members planned and conducted a junior leadership training program at the Gold Eye F.U. and C.D.A. camp. Specialists in the various phases of land conservation conducted study groups and tours during a week long camp at the Forest Technology School near Hinton. This camp was the first of its kind to be held in Alberta.

During the latter part of the summer, 250 top 4-H members competed for major award trips at the provincial Eliminations. Members took part in interviews, demonstrations, etc. Under the provincial Exchange program, nine 4-H'ers visited the other Canadian provinces, one to each province, while one member

from the other nine provinces spent 10 days in Alberta.

In addition, 17 4-H members and two leaders visited

British Columbia for two weeks under the Canadian Centennial Commission program.

Centennial Report

1867 | 1967

by JOHN W. FISHER
CENTENNIAL COMMISSIONER

The tax collector in the community might not like what I have to say but one often hears about owners neglecting to improve properties for fear of increased municipal taxes.

The argument goes something like this: "If I fix up the place the assessor will be around and up will go my taxes next year."

Not necessarily so.

Here is a list of things you can do outside at your house without increasing your municipal taxes. (The list varies with municipalities so you should check the local municipal clerk's office for confirmation): Remove open verandah; repair steps and porches; repaint woodwork; paint and repair existing masonry; new roof; repair gutters and downspouts; weather stripping and storm doors; lawns and landscaping; outdoor lights; repairing or replacing private walks; new fences or retaining walls; awnings or shutters; and garbage and rubbish containers.

If you do any of the things listed above you will tie in

with the Centennial Commissioner's national program aimed at achieving a coast-to-coast community face-lifting for 1967. Our Community Improvement and Beautification Program includes everyone from John Smith at 1 Maple Street to the biggest industry in town. There are no carrots in the form of grants-in-aid with this program. It is simply one of advice, encouragement and practical information.

Your local civic officials should be able to tell you about the details of Community Improvement and Beautification. Very soon they will have received our various "how-to-do-it" manuals--on everything from paint-up plans, what to do about trees in towns and on private properties, how to plant, how to organize rural clean-ups, lighting, boulevards, renovations and so on.

Of course there are many communities which have set good examples in programs like this long before the Centennial Commission started its program and its likely that they have not received the credit they

deserve. We are simply asking all Canadians to do the same thing to help make the "civilized" parts of Canada as beautiful as our vast natural surroundings--mountains, lakes and forests--beyond the cities and towns.

New Name For N.E.S.

A change of name, from National Employment Office to Canada Manpower Centre, was announced recently by F. J. Wheatley, Acting Manager of the Edmonton office of the former National Employment Service. Mr. Wheatley said that the new name reflects more accurately the emphasis that the Service is placing on counselling, training, labour force mobility, up-grading, research, and labour market information.

Rapid technological change is the reason for the increasingly important role that the Canada Manpower Centre must undertake. If the economy is to prosper, it must take advantage of new and improved ways of doing business, and, to make this possible, the labour force must be extremely adaptable and mobile. It is the job of the Canada Manpower Centre to assist the labour force to respond to these changes.

Mr. Wheatley said that both employers and employees will benefit from the new and improved service from the Canada Manpower Centre.

Fall Ideal Time To Fertilize

Do you fertilize your hay, pasture, and stubble fields in the fall?

According to A. W. Goettel, Supervisor of Soils with the Alberta Plant Industry Division the fall is the ideal time to apply fertilizers. Nitrogen applied at this time of year stimulates early germination of some weeds, thereby improving next spring's weed kills. Fall fertilizing also spreads the work load more evenly between seasons and eliminates the hazards of getting the equipment stuck and rutting crop fields, as so often happens in the spring. Fall fertilizer orders often receive off-car discounts.

Mr. Goettel says the higher rates of nitrogen now being used on an increasing number of Alberta farms has made broadcasting a common practice. Fertilizer rates above 25 pounds of elemental nitrogen per acre cannot be drilled in with the seed because of the danger of lowering germination levels.

Mr. Goettel recommends broadcasting nitrogen or nitrogen phosphorous fertilizers on hay and pasture land. Once these crops become established, the soil usually becomes deficient in nitrogen. Fertilizer recommendations vary with the percentage of legume in the mixture. As the legume content increases, the amount of nitrogen needed decreases but the phosphorous requirement becomes greater. The publication 'Fertilizer Recommendations for Alberta--1966' contains information on the

factors that influence the amount of fertilizer required and provides recommendations for hay, pasture and stubble crops.

Setting and operating equipment so that the fertilizer is evenly spread over the field is extremely important. The seed-drill type of spreader, the cyclone spreading machine, or an old converted grain drill can all be used to broadcast fertilizers. Fertilizing equipment should be thoroughly cleaned and oiled after use to prevent corrosion.

According to Mr. Goettel, many Alberta farmers are finding it advantageous to buy fertilizer in bulk and either rent spreading equipment or have the job done by a custom operator.

Legion Re-elects Zone Commander

Representatives from Edson, Jasper, Hinton, Wildwood and Drayton Valley attended the Royal Canadian Legion Zone meeting in Edson October 2nd. Steve Craddock of Edson was re-elected as Zone Commander for another term of office.

The business meeting was comparatively short with part of the business being deferred to the District meeting. This is to be held in the Evansburg Legion Hall on Sunday, October 16th.

Following the meeting the ladies of the Edson Branch Auxiliary served a delicious lunch before the visitors left for home.

It had been expected that representatives from the Robb Branch of the Legion would be down as well, but the first snow made it impossible for them to attend.

St. Anthony's Students Elect School Council

On September 19, the students of St. Anthony's School elected by secret ballot, the following people for the various positions on the students union executive: President, Keith Sodergren; Vice-president, Tony Huska; Secretary, Bonnie McGaughey; Treasurer, Charlotte Parenteau; Boys Sport Representative, Tom McGee; Girls Sport Representative, Joy Meraw; Social

Convenor, Brenda Anderson; Grade Ten Room Representative, Valerie Willner; Grade 9 Room Representative, Barbara Raske; Grade 8 Room Representative, Elaine Joyce; and Grade 7 Room Representative, Billy Scherger.

Last year's president, Margaret Hammerlindl is an advisor for this year's executive. Mr. McDonald is the staff advisor.

Rangers Elect New Officers

On October 15th Rangers began their new season with the election of officers. The following were elected; President, Carol Kruger; Vice-president, Barbara Rasko; Secretary, Nina Schurman; Treasurer, Margaret Hammerlindl; Reporter, Valerie Willner; Badge Secretary, Brenda Anderson; Musical Convenor, Bonnie Heyland; and Log Keeper, Bonnie McGaughey.

Mrs. H. Hammerlindl is again Ranger Captain. Sister Marie Gabriel is the new Ranger Lieutenant from Valley View.

Other rangers include Carol Rempel, Louise Waddel, Lorraine Coutu and Frances Meraw.

Keep Fit Classes

The Ladies Keep Fit Class commenced last Tuesday, October 11th with Miss Linda McMorris conducting the classes.

The classes will be held every Tuesday evening from 7:00 to 8:30 in St. Anthony's Separate School. A membership fee of \$5.00 will be charged to pay for the cost of renting the auditorium.

Any ladies interested are welcome to attend these weekly classes.

All winning contestants will be required to answer a skill-testing question.

DIAL 1260, 50,000 WATTS, EDMONTON

CFRN
RADIO

Have you ever wondered...

...what skills are necessary for a successful farmer?

Agriculture, motor mechanics, irrigation, horticulture, bookkeeping, welding, to name only a few. And his wife has to be part secretary, part cook, part homemaker, part gardener and part dressmaker. Future farmers and future wives of farmers can learn all these skills at the Alberta Agricultural and Vocational Colleges in Olds, Vermilion and Fairview. In addition to courses which teach the skills and knowledge required for a career in farming or a related occupation, the Colleges also offer

high school academics studies and commercial courses. During the 1965-66 school term, 636 students attended the three Colleges and this is expected to increase to 761 during the present school year.

...how being a good technical or vocational student can help you with the finances?

Being at the top of the class means more than honor and glory to students enrolled in

the Alberta Institutes of Technology or the technical or vocational section of an approved Junior College. It means money. On the basis of need, all students in these institutions are eligible to apply for loans up to \$1,000 under the Canada Students' Loan Plan and/or the Alberta Students' Assistance Act through the Students' Assistance Board of the Alberta Department of Education. A student who stands in the top quarter of his class may have up to \$400 of his loan converted to a grant. Those in the second quarter, up to \$300. The conversion system of grants is also in effect at the Alberta Agricultural and Vocational Colleges. Students at the Provincial institutions can win prizes up to \$50 for high academic achievement as well.

...what keeps Alberta air so clean?

As much a part of Alberta as her mountains and prairies is clean, fresh air. To see that it stays that way, constant vigilance is maintained by the Sanitary Engineering Branch of the Alberta Department of Public Health. Under the regulations which the Branch administers, all industries and municipalities must exercise efficient control of pollution, not only of air, but of water as well. Sanitary Engineering experts keep a sharp eye out to make sure these rules are observed. Possible water and air pollution sources are under constant surveillance. Regular sampling programs are carried out to ensure that the effluents released to the air and to the rivers are kept within the approved limits and that the quality of the air and water is maintained at a good standard.

...how Alberta can have its forests and cut them, too?

Although lumber production in the Province is increasing every year, the "green gold" of Alberta's forests is NOT being depleted, thanks to the

sustained yield policy maintained by the Forest Management Branch of the Alberta Forest Service, Department of Lands and Forests. Simply speaking, "sustained yield" means that, for every tree felled, one, and even two, should replace the original and that the yearly cut in any area should not exceed the yearly growth. To assist in maintaining forest growth and to help ensure a perpetual supply of timber for the Province, the Alberta Forest Service has planted over one million tree seedlings in the past few years.

...why there are fewer accidents at highway intersections in Alberta these days?

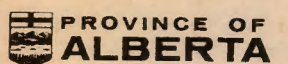

The answer's easy. Because there are fewer highway inter-

sections, and the Planning Branch of the Alberta Department of Highways is working continuously to decrease the number still remaining. Elimination of private direct access to highways, and the replacement of public access roads by interchanges, not only bring greater safety for the motorist but also prolongs the life of the highway and increases its capacity. Access control is just one way in which the Planning Branch fulfills its basic function, to ensure the maximum return to Albertans for each dollar invested in highway development.

...how you could turn back the clock and "unbuy" an unwise purchase?

Albertans who used to repent after buying in haste from a door-to-door salesman now have four days in which to ponder the wisdom of their action before being committed to a sales contract. Anytime within 96 hours of signing the contract, the purchaser can cancel it, under the terms of the Alberta Direct Sales Cancellation Act. The contract, can be cancelled within a year if delivery is not made within 30 days of the date specified, or 120 days of the date of purchase if no date is specified. The same privilege applies if the seller was not properly licensed when he made the sale. If a cancellation notice brings no results, the purchaser may lay his claim in writing before the Alberta Minister of Industry and Development through the Licensing Branch. The Direct Sales Cancellation Act does not apply to transactions where the goods are delivered and prices paid on the spot.

Warning to Work Camps

BY A. E. BRIDGES
Alberta Fire Commissioner
From time to time tragedies occur at temporary living quarters where workmen are employed on field projects. A typical accident occurred recently in the Buck Lake area according to a report this week by A.E. Bridges, Alberta Fire Commissioner.
One of three men living in a cabin arose early in the morning and started a fire in

the stove. He tried to light it with paper but by reason of having green wood did not succeed and went outside intending to bring diesel fuel to assist the fire. There were two cans adjacent to one another and by mistake he picked up the can containing hystest gasoline used for a lantern.
He poured the hystest gas into the stove and immediately, there was a flash fire causing him to drop the can

which spilled further fuel onto the floor. He shouted to rouse the other two men and one of them escaped but the third man was overcome by smoke and burned to death.
It is most dangerous to use flammable liquids to quicken any fire. The use of hystest gas is almost certain to result in an explosion and severe burns to the user and the result can involve others who are not able to escape in the case of such a rapid fire in a closed room.

The best possible chance to eliminate fire deaths and fire injuries is to constantly review the dangerous conditions that bring about fire casualties. If people know the facts, they will be in a position to avoid the danger.

Already in 1966 there have been sixteen deaths by fire--seven men, five women and four children. Sixty-seven persons were injured by fire from January to August 1st, 1966.

Don't give fire a place to start.

Auctioneer Wendy Sekura (left) is shown above calling for bids during the successful Rotary Auction Sale held recently. He is assisted on the low-boy by Ted Hutchison.

PUBLIC NOTICE

PUBLIC NOTICE IS HEREBY GIVEN THAT A VOTE OF THE PROPRIETARY ELECTORS OF the Town of Drayton Valley will be held on By-Law No. 371 of the said Town of Drayton Valley.

The following is a synopsis of By-Law No. 371:

A By-Law of the Town of Drayton Valley to authorize the Council of the said Town of Drayton Valley to add fluorides to the Town water supply for the prevention of tooth decay.

A copy of this By-Law No. 371 has been posted and will be kept posted in the Town Office and may be inspected at any time during regular office hours.

Polling will take place on Wednesday, the 19th day of October, A.D., 1966 between the hours of ten o'clock in the forenoon and seven o'clock in the afternoon at the Town Hall in Drayton Valley in Alberta at street address 5149 - 51st Avenue and at legal description Lots 43 and 44 in Block 1, Plan 6533 KS in the Townsite of Drayton Valley. I will be in attendance at the Town Hall on Wednesday the 19th day of October, 1966, at eight o'clock in the afternoon to sum up the votes and declare the results.

Given under my hand and the corporate seal of the Town of Drayton Valley this 12th day of September A.D. 1966.

W.G. Johanneson,
Returning Officer.

New Health Unit Building Ready in Mid-November

A regular meeting of the Edson Health Unit was held in the Town Office in Edson on Monday, September 19th.

Present were: Mr. P. Wells, Edson, Chairman; Mr. J. Wynne, Edson, Vice Chairman; Mr. W. Nowrie, Hinton; Mr. C. Dompnier, Evansburg; and Mr. D. McElroy, Secretary. Also in attendance were Dr. J. Brown and Mrs. P. Adams.

The chairman reported that progress was most satisfactory on the new Health Unit build-

ing in Edson and that occupation is likely to be approximately mid-November.

Dr. Brown reported that the authorities of Hinton, Edson, Drayton Valley and Wildwood had been notified of the change in Legislation relating to fluoridation of communal water supplies. A full discussion followed. It was intimated that a plebiscite would be held this October in Drayton Valley in conjunction with the civic election. This matter cannot be voted on in Hinton this year since a plebiscite was held in 1965.

A proposal relating to accommodation for the Health Unit in the Village of Wildwood was placed before the Board. It was decided that no action be taken in this matter at present.

Information relating to grants, which in the past had been made available to the Health Unit by the Alberta Tuberculosis Association, was given to the Board. This information was taken under advisement. It was also decided that a request should be made for discussion of such grants at the Board Members Conference to be held in Edmonton later this year.

The Financial Report for the period April 1st to August 31st, 1966 was presented and after scrutiny was approved.

Dr. Brown presented the quarterly medical report for the period April-June, 1966. The following topics were touched on: Measles vaccination program; dysentery incidence; tuberculosis skin testing and X-ray program; infant clinics; school services; sabin oral vaccination program; rheumatic fever prophylaxis program; guidance clinic arrangements for this area; dental program; milk producers and milk plant supervision; swimming pools - quality of water; testing of water supplies municipal, camp sites and private; visitation of construction and lumber camps, etc.; garbage disposal - need for improvement particularly where multiple dwellings are concerned; restaurants - hygiene, supervision; and dwellings - considered unfit for human habitation, placarding same, etc.

The report was adopted following discussion.

Dr. Brown reported that a

dental auxiliary would be available to the Hinton area on a part-time basis as from the beginning of October. The Unit will now have a dental auxiliary stationed at Hinton, Edson and Drayton Valley.

**VOTE
'NO'**

**On
Fluorides**

FLUORIDATION ONLY HELPS THE TEETH OF CHILDREN UP TO 12 YEARS OF AGE. THEY DRINK ONLY 1/10 of 1% of the water used in a water supply. WHY WASTE MONEY THIS WAY?

200 CITIES HAVE TRIED FLUORIDATION AND DISCONTINUED IT AFTER THE HIGH POWERED FLUORIDE CAUSED CORROSION OF MACHINERY AND WATER PIPES, making it TOO COSTLY. OTHERS found it impossible to maintain a constant concentration of 1 ppm or regulate the amount of fluoride taken by the children, from the water supply.

TABLET PROGRAMS ARE IN USE IN SWITZERLAND, GERMANY, IN U.S.A. AND MANY OTHER PLACES. This allows each individual the freedom to choose whether to use fluoride or not, rather than have it imposed on everyone in the community, through the water supply, be they aged, chronically ill or allergic etc.

GOVERNMENT LEGISLATION PASSED AT THE 1966 SESSION MAKES IT POSSIBLE FOR PERSONS WANTING

FLUORIDE FOR THIER CHILDREN, TO GET TABLETS OR DROPS THROUGH THE HEALTH UNIT OR HEALTH OFFICER at no EXTRA COST. THE USE OF TABLETS allows only those who can benefit from fluoride to have it, allows accurate dosage, allows for EASY DISCONTINUANCE OF ITS USE WHEN THE CHILD REACHES 12 YEARS OF AGE, or NO LONGER NEEDS IT OR IS ADVERSELY EFFECTED BY IT and allows EACH INDIVIDUAL TO DECIDE WHETHER OR NOT HE WISHES TO BECOME FLUORIDATED.

Government REGULATIONS FOR FLUORIDATION OF WATER SUPPLIES, requires equipment designed to minimize dust hazards, such as RESPIRATORS, CHEMICAL GOGGLES, RUBBER GLOVES AND BOOTS, ACID PROOF APRONS etc. for all who handle fluoride. On the Drum containing SODIUM FLUORIDE there is a WARNING LABEL "MAY BE FATAL IF INHALED OR SWALLOWED" and plainly marked with 2 SKULLS AND CROSS BONES - the POISON WARNING.

Deadline Posted for A.I. Technician Course

October the 30th is the closing date for applications for the Vermilion artificial insemination technicians' course.

According to H.B. Jeffery,

Supervisor of Artificial Insemination with the Alberta Department of Agriculture, this course is one of the most complete and comprehensive to

be found on the vocational level anywhere in Canada. It covers artificial insemination and related subjects, including anatomy, physiology, bacteriology, nutrition, genetics, semen processing, A.E. techniques for both cattle and swine, public relations, and business administration.

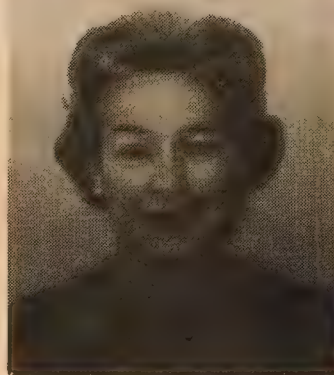

Applicants, says Mr. Jeffery should have a diploma in Agriculture from a recognized agricultural school or college, or the equivalent. In education or experience. Preference will be given to applicants with an Animal Science Major. Applicants must also provide a written statement from a qualified A.E. technician stating that they have spent approximately one week with the technician or his associates familiarizing themselves with an A.E. technician's work.

Mr. Jeffery advises anyone interested in an artificial insemination technicians' course to contact Mr. Wm. Baranyk, Principal of the Vermilion Agricultural and Vocational College, Vermilion, Alberta, and ask him for a 1966-67 Coll College Calendar. The application form enclosed with the calendar should be sent back to Mr. Baranyk.

Talent Show Here Nov. 26th

Search for Talent will be at Sangudo on Saturday, November 12. It will be held at the Sangudo school auditorium under the auspices of the Sangudo C.W.L.

The Drayton Valley Branch of the Legion will bring Search for Talent to Drayton Valley on Saturday, November 26, commencing at 7:30 p.m. The show this year will be held in

the Drayton Valley Separate School Auditorium; and registrations are being taken at Copeman's Shoe Store. James Dean, Legion president, is the convenor.

Search for Talent comes to Onoway on Saturday, February 25, 1967.

Local service groups play a major roll in bringing Search for Talent to twenty-one communities during the twentieth annual Search for Talent Series of shows and broadcasts this season. George Harasim, president of the Associated Canadian Travellers of Edmonton, in addressing the A.C.T. Search for Talent committees recently, stated that without the co-operation and support of the local organizations who sponsor Search for Talent, the project would not enjoy the success it has over a period of twenty years.

In outlining the co-operative plan, Mr. Harasim stated that Search for Talent goes to a town upon invitations of a local service group. This group takes an active part in laying the groundwork for the show and in promoting the coming event through an advance sale of tickets for a local award plus a season-end award of a Trip for Two to Expo '67. Tickets are sold on an incentive plan which provides funds for the sponsoring organization. Consequently, Mr. Harasim explained, the organization that sells most tickets receives the largest slice of the ticket proceeds

for their own local community service.

Interest in the work done by the Associated Canadian Travellers in the promotion of talent and through it, in the

work with needy crippled children, is reflected in the large variety of organizations sponsoring the shows from town to town and season to season.

fashion news

BY NANCY GAYLORD

FASHION CONSULTANT TO THE 160 SINGER CENTERS IN CANADA.

The anti-madness movement is the antidote to the crazy, bizarre fashion look of late (called the Great Revolt). Both were started by London designer Mary Quant. She sees a future with clingy evening shapes, soft lady-like lines for day and flattering, feminine colors . . . not at all gimmicky. This new concept heralds the return of well-bred simple shapes, lots of color and soft supplé fabrics. Hurrah! Hurrah!

Press for perfection in sewing fashions. Use the iron after every step, and after completing a tailored garment let your cleaners add the finishing touch — a professional press.

Stripes are slick when ruled across stretched-out sweater shifts. Bold bands of color slash straight or zig-zag around and around knit tubes with long tight sleeves. This is a look that's sure to cut you down to size if you're very tall. Heady combinations like navy and cayenne, or grape and olive, color these smart sophisticates.

On a budget? Who isn't! When it comes to clothes, coordinate like an expert for a wardrobe

that looks like a million but doesn't cost it. Choose matching coat and "little nothing" dress in your favourite color. Sew a skirt, slacks and a jacket, (now called a trouser suit) in a check or plain that really looks good with the coat color. Add a couple of blouses and one set of good accessories. Now . . . mix 'em and match 'em. How many combinations can you come up with? (I get 10).

A White Christmas is the perfect contrast for the rich, jewel tones of luxurious velvet — the fabric that flatters every complexion and figure, the young and the young-at-heart. Fashion into a glamorous holiday dress with the new halter front and an X of straps at the back.

To sew, check that the pile goes up on all pieces. (It feels smooth when stroked upwards from the hem). Sew the zipper in by hand with tiny backstitches spaced 3/8 inch apart on the right side. Strengthen by machine stitching the zipper tape to the seam allowance. This is the way designers hide zippers in their elegant clothes.

CHECK MEDICINE CABINET FOR FAMILY SAFETY.....

A cluttered medicine chest is not only inefficient but downright dangerous. Labels have a way of becoming smeared or torn over a period of time, leaving you to dangerous guesswork when trying to determine what is in each bottle. It is the type of guesswork which sends hundreds of persons to the hospital each year after having taken the wrong thing.

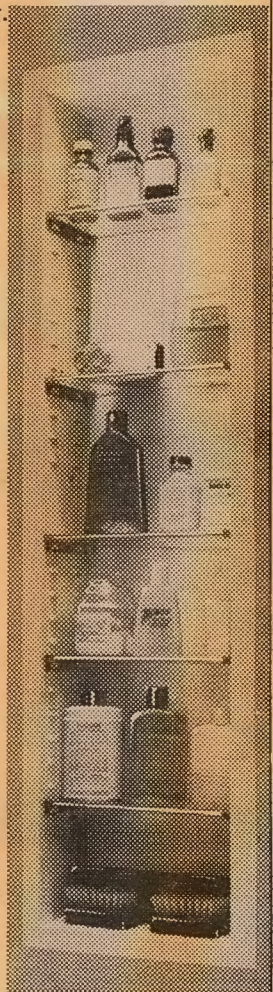

Fifteen or twenty minutes invested in giving the family medicine cabinet a full dress inspection each Fall will pay off handsomely in better family health and safety. Screen the contents of the cabinet and throw out anything remotely questionable.

Try to keep the number of items stocked at a minimum to simplify storage, avoid confusion and enable you to find what you want without losing precious time in an emergency.

Researchers for the Murine Company have completed a study of the family medicine cabinet and have come up with these recommendations: store items in an orderly fashion. Place frequently used items such as toothpaste and brushes, eye drops, and bandages on the lower, easy-to-reach shelves. Razors and razor blades, although used every day, should be stored on an upper shelf to keep them away from curious children. All medicines should be stored as high in the cabinet as possible.

Did you know that many of the common and necessary items in the home medicine cabinet deteriorate with time, with the high humidity and higher temperatures of the bathroom adding to the loss of potency?

Items such as eye drops, however, are a medicine chest necessity which do not deteriorate rapidly. They are now available in Canada in a yellow plastic bottle that dispenses one drop at a time.

S.A.I.T. Seeks Graduate of First Class

Canada's oldest technical institute, the Southern Alberta Institute of Technology, is scouting the country for a graduate of the class of 1916 to help celebrate its 50th anniversary, October 13.

Donald Fleming, principal of the institute and a member of its staff since 1937, is confident that, somewhere in Canada a graduate of the first courses begun in 1916 at the Colonel Walker school will be found.

The first graduate of Canada's oldest technical institute will receive a prize and an all-expense paid trip to Calgary for the special jubilee celebrations.

At the outset, the school was called the Provincial Institute of Technology and Art and the principal was Dr. J.C. Miller, a pioneer in the field of technical and trade training in Canada and Alberta's first director of technical education.

A graduate of the technical institute of this era will recall such early courses as telegraphy for station agents or steam tractor maintenance and repairs.

Since the founding of the institute in 1916 when five students registered for classes under seven instructors, more than 50,000 students have enrolled for technical courses.

Nearly 7,000 of them are now enrolled at the institute today. They are receiving instruction in more than 500 subjects through day, night and correspondence courses.

All of the earliest graduates are extended an especially warm invitation to return to the campus for jubilee day celebrations and are asked to write or phone Mr. Fleming at the institute.

The morning of Jubilee Day the Institute will be holding an Open House for former staff and students who will be able to see the many changes that have occurred over the years, including the current construction.

Weather Forecasts Ended Until About May 1st

The Alberta Agricultural Weather Forecasting Service will be closing down for another season on October 31st. It will be resumed again about May 1st, 1967.

The service is prepared by the provincial Department of Agriculture in consultation with federal meteorologists at the Edmonton Public Weather Office. For the past four-and-a-half months, present and future weather patterns have been analyzed each day and related to agriculture.

The service is designed to help farmers plan their day-to-day operations in accordance with prevailing weather conditions. It has proved particularly valuable during haying

and harvesting seasons.

The agricultural forecasts are long-range forecasts, covering a three-day period. Issued for the current and following day with an outlook for a third day, they are distributed six days a week, to 22 radio and television stations throughout the province.

FLOURIDATION

People in Drayton Valley will be able to assure their children of sounder teeth with the flouridation of the communal water supply, various pure water addicts have been campaigning against the flouridation of our water supply. If you are in doubt of the benefits that the general public will receive from the addition of flourides to the communal water supply we ask you to go to your Medical Doctor, your Dentist or the Health Unit that serves the town, these are the people that are interested in the Health and Welfare of the people in Drayton Valley.

VOTE 'YES'

Inserted By
Drayton Valley Pro-Flouridation Group

DRIVE-IN 1/2 MILE EAST OF TOWN - SHOW STARTS AT DUSK

Thursday and Friday, October 13th and 14th - JUDITH - Peter Finch, Jack Hawkins, Sophia Loren in color.

BIRDS TO BEWARE OF

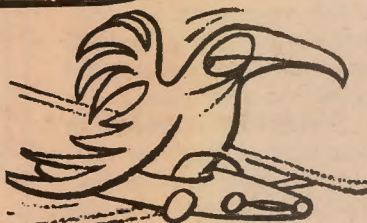

Unfortunately, these species are not extinct, so while you're driving, keep a sharp lookout for these birds—and be sure that no one thinks you're one of them

NOCTURNAL DIMWIT
(drives in the dark with parking lights)

ONE-WINGED ROOF CLUTCHER
(disdains two-handed driving)

CROSSWALK CREEPER
(can't resist cheating on the take-off)

ADDLEPATED HONKER
(always sounding off without reason)

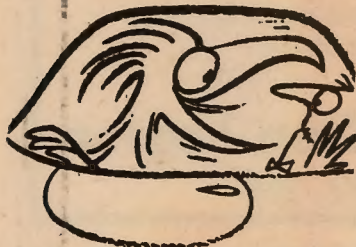

ONE-EYED NIGHTHAWK
(ignores his burned-out headlamp)

HILL-PASSING SWIFT
(ignores no-passing signs on hills)

RUFFLE-FENDERED TAIL-GATER
(he bears the marks of too-close contact)

HEAD-TURNING CHATTERBIRD
(seldom bothers to keep his eyes front)

WIDE-SWEEPING TERN
(watch out for him on curves)

Each summer, 60 outstanding Air Cadets representing all parts of Canada are chosen to travel abroad as goodwill ambassadors for Canada.

CANADA MANPOWER CENTRE

Your National Employment has taken on a new name

It's the same address

Main Office: 10210 - 107 Street

Branch Office: 10207 - 97 Street

Edmonton

It's the same phone number

429-2621

But the name is now

CANADA MANPOWER CENTRE

There will be more than a new name at your Canada Manpower Centre. There will be increased emphasis on such important labour market activities as counselling, training, labour force mobility, up-grading, research, and labour market information. There will be improved service for both employers and job seekers.

Whether you are looking for a job, for a worker, or just for information about employment generally, the place to go is the Canada Manpower Centre.

EXPORTS TO JAPAN

Although sales of wheat behind the iron and bamboo curtains usually receive the greatest publicity, the tiny island of Japan is the best customer farmers have, after the traditional United Kingdom market.

Recent Dominion Bureau of Statistics figures show Japan's

total purchases of agricultural products rising over a five-year period from \$83,439,654 to \$113,033,466. Saskatchewan's share of this sales total was \$63,287,935, making the wheat province the leader in exports to Japan.

Of the \$63 million, \$57 million was spent on wheat, \$4 million on flaxseed,

Second largest exporter to Japan is British Columbia, with sales of \$61 million, made up mainly of mineral ore and lumber products. The other provinces trail far behind. Alberta is third in line, with sales of \$28.8 million.

The most recent figures released by government sources show Canada to have exported \$296 million in goods to Japan while importing goods valued at \$126 million. This gives Canada a trade balance of \$170 million.

Projections of Japan's rate of economic growth indicate a steadily widening market for Canadian products and services.
